a journey through Alfred Hitchcock´s movie “ROPE” [1948]. by “driving” the box around the room, you are making your way through the movie. it is a hughe wooden box (wash-machine sized, on wheels). it features a small window to look inside.

by pushing or dragging the box around the place, you actually move through the movie in the virtual space inside the box. just look inside! you see some fragmented graphical key-elements of the movie, as well as hear the most important dialogues, and you are free to explore it. all in real time!

commercial » FORD Street Ka Allonge

a 5 seconds short movie for ford austria. heavy post-production. provided with very poor quality input material. the car was blue with french number plates, i painted it red and replaced with stolen austrian number plates :-) dont blame me for the aesthetics, it was Ogilvy´s “creative´s” wish. the pict - before and after (2 weeks of work)

short movie » KLARA - I´m Still Completely... (Remix of a 1952 movie “1st April 2000”)

KLARA is **Kl**einl David / **Ara**povic Andrija

we did a remix of an old austrian political science-fiction comedy “1st April 2000” from the year 1952. The movie itself was rather a blockbuster, big-budget production back in the day, today it is a relict of austrian/european movie industry and an oddity of a movie :-) hillarious to watch!

it´s a rip-off of a “classical”, “default” generic p0rn site which installs you a dialer. here is no dialer, no p0rn, just Pink-PatrioticPorn! CHECK IT OUT!

btw, there are about 10 visitors a day coming to the site looking for “free sex software” through their favorite search engine. but they dont get no p0rn, no dialer... SURPRISE :-)

here, i started from a scratch. there was no design, no orientation, beside orange color.

the site was about the book “wiener wander tage” (viennese marching days) which was a name for thursdays-demonstrations against the new conservative/right wing government (what year was it, 2000, 2001?). the protest marches lasted for something like 18 months. in the meantime, the site being hosted by a left orientated media-arts-group, is now offline, guess why... that media-arts-people lost their subventions and they themselves went offline.

it is a short digital story, told in 4 king-size picts (3444x3420 pixels) nowadays, most browsers downsize larger pictures... back in the day it was fun watching computers / browsers going down under the heavy-weight load of 9 megapixels jpeg :) the story itself...
it features an android (kind of a bender) and it is all about his visit to LA and his analog (drunken) / digital interference with the beverly hill(s)

beside being a cool domain name, it´s a home for a small experiment i did several years ago... an experiment in navigation / narration.

it is rather a simple site. it features a loop of several pictures and it contains the first passages from tolstoi´s “war and piece”. and there is some gimmick about the way the written content is presented / the way you read (navigate) through the story.

net » lepabrena.com

Lepa Brena is an ex-YU folk star... i hijacked her name .com back in 2000 and put up some rather chaotic / anarchistic content on this site.

in effort to reflect the situation of war / general anarchy / politically established hatered, that was on daily agenda in serbia back at that time. it still was under slobodan milosevic´s pathological rulership.
